

## ECO Drum available for steering axles with drum brakes SN 4218 and SN 4220

Since 03.07.2008, ECO Drum brake shoes have been used as OEM equipment in all steering axles in the series M...L 9, 12 and 14 t with SN 4218 and SN 4220 drum brakes. The steering axle has been modified to allow the ECO Drum brake shoes to be used.

For spare parts purposes, therefore, steering axles from production number 082732533 onwards can be equipped with ECO Drum brake shoes SN 4218 (05.091.46.32.1) and SN 4220 (05.091.47.04.1) which are familiar from rigid axles.

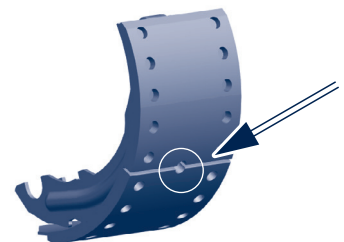

The changeover to the ECO Drum brake shoe means that the steering axle now includes all the advantages associated with the introduction of ECO Drum. The special design of the brake shoe, in particular the lining location key, simplifies installation and eliminates the possibility of errors in lining changes. At the same time, the special shape of the brake shoe helps in positioning when new linings are being fitted. This makes for even easier servicing.

The brake type approval is not affected!

### Replacement compatibility

**Old:**  
**BPW code number:**  
 SN 4218 -> 05.091.46.14.1  
 SN 4220 -> 05.091.27.82.1

**New:**  
**BPW code number:**  
 SN 4218 -> 05.091.46.32.1  
 SN 4220 -> 05.091.47.04.1

Steering axles **before**  
 production number: 082732533

Steering axles **after**  
 production number: 082732533

**NB!** ECO Drum brake shoes cannot be used with steering axles before production number 082732533.
