

BPW spare parts now available on-line

As from May 2012, it is now possible to search for and identify spare parts in our exclusive BPW Customer Network to supplement the spare parts lists of BPW axles and suspensions used up to now.

With this addition, BPW is now offering a further helpful service to allow for the simple and rapid identification of any spare parts required.

No additional or separate Customer Network registration is required. New registrations are made via the BPW website (www.bpw.de/kunden-net) and are processed immediately. Access data is then sent by e-mail.

BPW Customer-Net

A search in response to an actual enquiry is made using the 10-digit BW code number. There is also the option of entering the BPW code number without dotting. Leaving off the closing numbers and replacing these with an * can also be selected when searching for spare parts.

If the BPW code number entered is available, it is now possible to identify the spare part code numbers contained in the parts list by opening (+) this list.

Clicking on the individual sub-items calls up the depiction required and the dimensions of the part. The code numbers can be verified using the dimensions.

The list selected according to the code number or the code number cycle entered can then be exported as a PDF file in 6 languages (German, English, French, Spanish, Italian and Russian).
