Successively conversion of BPW spring U-bolt for ECO Air

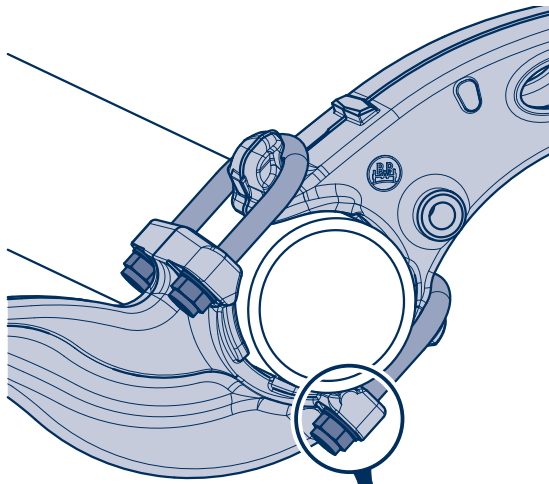

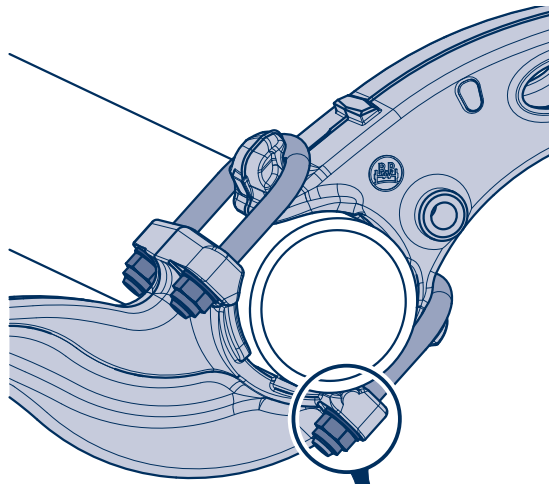

BPW is optimising its well-known ECO Air spring U-bolt and implementing this conversion as part of a product enhancement process.

The spring U-bolt will be extended by 5 mm as a result of this conversion. This product enhancement will ensure modularity and enable the BPW air suspension kit to be further expanded in the future.

The existing version of the spring U-bolt will remain available until the introduction of the new generation of BPW air bag beams (gradual introduction from Q2/2022).

Once the old stock will be completely sold out the conversion to the new generation of spring U-bolts will take place – this will be fully backward compatible.

Please note: The existing version of the spring U-bolt will not be available as an individual part in the aftermarket and is incompatible with the new generation of BPW air bag beams (from Q2/2022)!

Old BPW item number		New BPW item number
