25.05.2022

BPW has optimised its ECO Air spring U-bolts and has implemented this upgrade and extended spring U-bolt by 5 mm as part of a product enhancement process (see News Aftermarket 2022-03).

As an additional step in the current product enhancement process, the air bag beams will be thickened up by 5 mm at the drilling area. This version will be gradually introduced from Q2/2022.

Please note: The new generation of air bag beams should only be assembled by using the new spring U-bolts that have been extended by 5 mm (09.801.09.45.0). Assembling the new air bag beams with the old spring U-bolts (09.801.09.03.0) is not permitted. To prevent vehicle breakdown, we recommend not to mix possible existing Components on stock.

Old BPW air bag beam	
Product	Old item number
Spring U-bolt	09.801.09.03.0
Air bag beam	03.244.20.22.0
Air bag beam	03.244.20.23.0
Air bag beam	03.244.20.24.0
Air bag beam	03.244.20.25.0

New BPW air bag beam	
	New item number
	09.801.09.45.0
	03.244.20.32.0
	03.244.20.33.0
	03.244.20.34.0
	03.244.20.35.0
