NOW ECO Plus comfort for 12 t NH/KH low-loader and swivel axles

Since April 2017, the 12 t NH / KH – Low-loader axles and the swivel axles are available with ECO Plus bearing technology. In this product group you can also enjoy the benefits of the new 5+3 ECO Plus warranty (*) with 3 years' warranty on brake cylinders, shock absorbers and air bags.

The proven maintenance free ECO Plus bearing technology with completely sealed construction ensures not only the highest performance and availability, but also an ease of maintenance and repair in case of service. Your benefits are:

- › Time-saving brake pad change by easy dismantling the wheel-end using the formula 1 principle thanks to the central axle nut
- › Bearing pre-load automatically set by central axle nut with integrated torque limiter
- › With optimized ECO Seal sealing system
- › Short downtimes due to globally available DIN ISO tapered roller bearings and replaceable sealing elements

With the ECO Plus bearing technology, you save not only time but also weight, in combination with the new Airlight II suspension. The use of Airlight II-suspension can bring you significant weight savings at 12 t NH-low-loader trailer as well as 12 t KH-Megatrailers.

For example, in case of changing from SLU suspension with 2-leafs trailing arm to ALU suspension, a weight saving from up to 39 kg per module can be achieved.
