Modification of the T-piece for AirSave

Since the series launch in November 2019, BPW has been supplying the AirSave tyre pressure refill system.

With immediate effect, the axle will be supplied with a modified T-piece. In future, the connection for the compressed air hose from the control box will have a connection with a diameter of 8 mm, instead of 6 mm as before.

This enables the use of the standard dimensions of 8 mm of the compressed air hoses that are usually available.

Compressed air
hose of the axle:
6 mm

Compressed air
hose of the axle:
6 mm

Connection for the compressed
air hose of the control box:
8 mm

You don't know the AirSave tyre pressure refill system yet?

With AirSave, BPW offers a robust tyre pressure refill system ex works that continuously monitors the tyre pressure and maintains the correct air pressure all the times.

BPW provides you with security with its own AirSave hubcap adapter, which guarantees the tightness of the system in combination with BPW axles.
