

## Certificate of equivalence BPW drawbar assemblies

As part of the application for grant of approval according to ECE Regulation no. 55, revision 01, and supplement 03, for BPW drawbars and hitch blocks, after receiving the ECE approvals, BPW-Hungária Kft., Szombathely is gradually converting its existing axle type plates in line with the above-mentioned regulation.

The following table provides a comparison of the old and new approval numbers for each drawbar assembly.

This table is an aid for the replacement of BPW drawbar assemblies named according to the old EC approvals with drawbar assemblies named according to ECE approvals.

BPW states that the named drawbar assemblies are technically equivalent to the EC approval numbers. In some cases the use area has been further enhanced.

The use of drawbar assemblies with EC approvals according to 94/20/EC is currently still possible within the scope of existing old vehicle type-approvals, the assessment of vehicles in individual cases, and as spare parts.

### Important note for homologation:

Since 01.11.2012, new EC vehicle type-approvals are only possible with drawbar assemblies according to ECE-R55.
