Steering system in BPW AGRO FlexFrame

For the BPW AGRO FlexFrame we offer a complete solution with electro-hydraulic steering system all components are already installed. For this purpose, a functional test will be carried out before delivery.

- › Speed-dependent steering functions
- › Numerous steering programs like slope drift compensation, manual steering or crab steering
- › Different operational functions for street and field
- › Integrated check functions like signal monitoring of the driving speed of the centring position and the hydraulic supply

AGRO FlexFrame ME 2017-006-ENG

Integrated safety angle sensor
in the **AGRO Turn** steering axle

Your advantages at a glance

- › Dramatically reduced tire wear
- › High degree of driving stability and driving safety due to speed-dependent steering functions
- › Special steering programs to minimize ground impact
- › Manual steering possible
- › Unlimited steering capability when reversing

Features and benefits

- › Preprogrammed all-in-one system with frame unit
- › Ready to use
- › TÜV-certified system
