

Launch of a new BPW shock absorber design

From August 2015, a new BPW shock absorber design will be available alongside the existing models.

The launch of the new BPW plastic protective tube design for the HD shock absorber 02.3722.04.02 will take place from August 2015 under the same code number.

From January 2016, further changes will be made to the shock absorbers in the BPW product portfolio. We will provide you with timely information here.

BPW's existing design will remain alongside the new design.

The shock absorbers are technically identical, right down to the design of the protective tube. This means that the shock absorbers are interchangeable and can be mixed in the same vehicle or on the same axle.

Your BPW contact person can provide you with further information.
