

Series launch of the BPW landing gear generation 2 in April 2016!

The next generation of the BPW landing gear is distinguished by a significantly reduced weight and a modern design.

Advantages at a glance:

- › reduced weight
- › modern design
- › partly integrated gearing with improved sealing and easy shiftability
- › strengthened shaft for absorption of lateral forces
- › low crank forces for easy operation
- › continuous screw-on plate for flexible installation
- › maintenance-free for 3 years e.g. due to long-term lubrication of the spindle with BPW ECO-Li 91
- › high-quality coating for protection against corrosion

The previously known product portfolio is replaced, but will remain in its range. The new generation is orderable from April 2016.
