AirSave – current status

Starting in November 2019, BPW will introduce the AirSave tire pressure control system. From this date, all axles intended for AirSave, 9–12 t ECO Plus, will be pre-assembled with the corresponding components.

BPW supplies its own **AirSave hub cap adapter** for this purpose, which guarantees the tightness of the system in combination with BPW axles.

From November BPW will **not be offering any prepared** axles (in the 9–12t ECO Plus range).

It is not permitted to retrofit AirSave and therefore to drill the axles stub later on and leads to the loss of warranty claims.

If you have any questions, please contact your sales contact.
