

## Color change of the BPW HD shock absorbers to silver-gray RAL 7001

In order to complete the conversion of the HD shock absorber series to the new color, from February 2017 also the type 02.3722.04.02 will be gradually switched over to the new color silver-gray RAL 7001.

At the end of the quarter 1 / 2017, all HD shock absorbers are clearly to identify by the new color silver-gray and the previous blue color RAL 5015 has been replaced. This applies to shock absorbers with metal- and plastic-cap (Capuchon design). The HD shock absorbers, which are supplied as standard with the new air suspension program ECO Air COMPACT HD, are already available exclusively in silver-gray with plastic cap, as announced to the IAA 2016 and market launch in November 2016.

No technical modifications are made, meaning that HD shock absorbers in old- and new-design are compatible. The introduction is done under the same part number.

| Previous design   |   | New design   |   |
|---|---|--|---|
| Metal - cap   | Plastic - cap   | Metal - cap  | Plastic - cap   |
