

we think transport

LOWER WEIGHT, GREATER SAVINGS.

BPW alloy hub

Keep the performance, lose the weight!

THE BPW EFFECT

54 kg

weight saving
in 3-axle suspensions

When it comes to tank and silo transport as well as lightweight trailers, every kilogram of unladen weight that can be saved directly increases your profitability, as it means an increase in the truck's usable load. But most weight-saving measures come with drawbacks somewhere else – not the case with BPW's new forged alloy hub. This is because despite **weight savings of 18 kg**, you do not have to sacrifice stability or durability.

IMPRESSIVE BENEFITS

- Greater usable load due to lower unladen weight. Save up to 54 kg and € 500 per year with a 3-axle suspension.
- Environmentally friendly due to lower CO₂ emissions. By lowering the vehicle's weight, you reduce energy consumption with the same cargo volume.
- Can be retro-fitted to all existing axles and combined with AIRLIGHT suspension.
- Highest stability due to high-strength forged alloy hub.
- Alloy hub cap included as standard.
- Extremely durable thanks to optimal corrosion protection through cathophoretic dip-coating (KTL_{Zn}).
- 5+3-year ECO Plus warranty for on-road and standard off-road use. Includes 3-year warranty on brake cylinders, shock absorbers and air bags.

**NOW ALSO
AVAILABLE FOR
DRUM BRAKES!**

TECHNICAL FEATURES

9 t axle load

for single tyre

with air suspension

disc brake: TSB 3709 / TSB 4309

with ET0 offset

TK 335 × 10 wheel connection

ECO Plus bearing technology

drum brake SN 4218
