Conversion of Brake Pad Kits for Knorr Brake Caliper

BPW will successively convert the disc brake pad kits for Knorr Brake Calipers from double key into the single key which is the patented version in Germany.

In line with the launch of the adjusted disc brake pads kit there will be additionally the adjusting adapter, the plastic cap as well as the retaining clip to be included in the new brake pad kit.

Due to this conversion the BPW code numbers will change as follows:

- › 09.801.08.15.0 -> 09.801.08.15.1
- › 09.801.08.16.0 -> 09.801.08.16.1
- › 09.801.08.17.0 -> 09.801.08.17.1

Single key pad advantages:

- › High mileage and maximum wear volume
- › Incorrect installation is impossible and therefore avoidance of component damages
- › Optimal friction pairing with original brake pads and brake discs
- › Backward compatible
