# Digitise your vehicle and cargo!

**With the innovative TC Track&Trace telematics box, all hauliers can now digitise their processes easily and inexpensively!** The compact box does not require a power supply, SIM card or antenna, and can easily be attached to the vehicle, container or swap body. The data sent by TC Track&Trace are displayed on the cargofleet online platform and as a result, provide maximum transparency regarding the route and position at all times. And because the device uses new and innovative wireless radio data transmission technology, it does not require expensive and energy-intensive components, the battery does not need to be changed for up to two years (first battery included).

## IMPRESSIVE BENEFITS

- Tracking is performed every 20 minutes while in transit.
- Battery life of up to two years.
- GPS positional accuracy (up to 5 m).
- Has an extremely robust housing (IP67 rating).
- Uses mobile Sigfox data technology.
- Optimised for vehicle and asset tracking.

SERVICE  
**3.99 EUR\*/mthly.**  
RUNTIME  
**36 Months**

**Please note:**

In comparison to classic telematics solutions, the following different functional information applies for the TC Track&Trace: The Sigfox wireless technology is currently in development. Network coverage in Germany is currently around 85 %. Positions are always transmitted at the last time of measurement. Additional sensors, cooling units, etc. cannot be connected. EBS-data and events are not transmitted.

You can learn more about current Sigfox coverage for other countries on the Sigfox website:  
<https://www.sigfox.com/en/coverage>.
