# BPW AGRO Hub

## Communication with ISOBUS and app for displaying axle loads and tractor mileage.

- › The AGRO Hub developed by BPW provides a precise overview of running gear mileage. Integrated sensors determine the total mileage and daily mileage. The vehicle owner or driver can call up either operating hours or mileage. Vehicle usage is quickly and accurately tracked with graphs.
- › The data is displayed via the BPW AGRO app (for Android operating systems), which can be wirelessly connected to the AGRO Hub. The system also offers ISOBUS communication channels.
- › Weighing system via integrated axle load sensors on the axle housing.
- › In addition to this data, the BPW AGRO Hub also features an integrated maintenance interval function to optimize vehicle operation.

AGRO Hub 2017-012-ENG

### Functions

- › Wireless communication with free Android app
- › Weighing system
- › ISOBUS communication
- › Mileage reading, resettable mileage reading (trip distance counter), average speed, maximum speed, current speed
- › Maintenance interval display

### Features and benefits

- › Greater cost-effectiveness through cost-control
- › Wireless communication
- › Display: mileage, operating hours, trip distance and trailer weight
- › ISOBUS communication
- › Maintenance reminder
